FUNGICIDE

Mancozeb 800g/kg Guarantee: **Wettable Powder** Formulation:

Classification: Alkylenebis (dithiocarbamate)

### **General Description**

OSHOTHANE 80WP is broad-spectrum protective fungicide that controls a wide range of fungal diseases on a variety of crops. It is a non-specific thiol reactant that inhibits respiration.

OSHOTHANE can be used for the control of fungal diseases such as blight, leaf spot, downy mildew, scab, etc., in field crops, fruit, nuts, vegetables, ornamentals, etc. It is especially effective in the control of early and late blights of potatoes and tomatoes, gray & Septoria leaf spot diseases on vegetables, roses, carnations, asparagus, and beans.

#### **Mode of Action**

Non-specific thiol reactant, inhibiting respiration. Fungicide with protective action.
