

WHO CLASS III

# D-AMINE<sup>®</sup> 72% HERBICIDE SOLUBLE LIQUID

Guarantee: **Salt of 2, 4 dichlorophenylacetic Acid (600g/L)**  
Classification: **phoxycarboxylic acid**  
Formulation: **Soluble Liquid**

### Description:

D-AMINE 72% is a systemic, selective post-emergence herbicide for the control of annual and perennial broad-leaved weeds.

### Directions For Use:

- N.B: - It is advisable to apply D-AMINE 72% at early post emergence of weeds.
- The weeds should be young and actively growing.

### Mode of Action:

The salt is readily absorbed by the roots. Translocation occurs with accumulation principally at the meristematic regions of shoots and roots, acting as a growth inhibitor.

### Recommended Application Rates

CROP	WEEDS	RATES
Maize, Sorghum, Orchards, Sugar cane, Rice	Broad-leaved weeds	1.5 - 2.5 L / Ha (120-150ml in 20L)
Wheat	Broad-leaved weeds	1.5 - 2.5 L / Ha (120-150ml in 20L)

Spraying volume: Use 200-400L of water per hectare.

**Phytotoxicity:** Do not apply this product to or otherwise permit it to come into contact with cotton, oats, grapes, fruit trees, vegetables, flowers or ornamentals. Do not apply at temperatures above 32°C.

**Compatibility:** This product is generally compatible with other herbicides.
